ABOUT

I am currently pursuing my undergraduate degree at Rajarata University Of Sri Lanka. Throughout my academic journey, I have gained in-depth knowledge and hands-on experience in Full-Stack Development, equipping me with the necessary expertise to excel in the Software industry. I am eager to apply my skills to real-world projects and contribute to innovative solutions. I am seeking opportunities to apply my technical expertise in a dynamic and innovative environment where I can contribute effectively and grow as a software engineer.

EDUCATION

Bachelor of Information Communication Technology [BICTHons] <i>Rajarata University of Sri Lanka</i>	Expected Graduation 2027
---	---------------------------------

- Academic Focus:Currently completing advanced honors-level credits (74+ Credits earned).
- Key Coursework: Design Patterns, Web Development, and Object-Oriented Programming.

CERTIFICATIONS

Learning Docker <i>LinkedIn Learning</i>	2026 february
JavaScript for Beginners <i>Simplilearn</i>	2026 january
Introduction to DevOps Tools <i>Simplilearn</i>	2026 january
CCNA 200-301 Network Fundamentals <i>Simplilearn</i>	2026 january
Introduction to Cyber Security <i>Simplilearn</i>	2026 january
Project Management 101 <i>Simplilearn</i>	2026 january

RESEARCH

An AI-Integrated Open-Source Intelligence.Framework for Automated Privacy Risk Assessment and Digital Footprint Mapping (Jan 2026 - present)

- Developed an automated OSINT framework utilizing AI to map expansive digital footprints and identify potential data leakages across diverse public domains.
- Engineered a real-time privacy risk assessment pipeline leveraging machine learning models to categorize data sensitivity and provide actionable mitigation strategies for digital identity protection.

PROJECTS

Full-Stack E-Commerce Platform (Individual Project)

January 2026

[Repository Link](#)

- Developed a high-performance MERN-stack e-commerce platform utilizing a scalable 2-tier architecture and MongoDB to manage dynamic product catalogs and user data.
- Integrated secure Stripe API for payment processing and engineered an Admin Dashboard for real-time inventory management and user review moderation.

Small Business Order Management System (Individual Project)

January 2026

[Repository Link](#)

- Developed a streamlined order tracking and management solution using Spring Boot (Java) and PostgreSQL to optimize workflows for small-scale enterprises.
- Engineered a unified dashboard in React.js featuring real-time order monitoring, automated inventory updates, and centralized customer data management.

Full-Stack Salon Management System (Group Project)

Mar 2022 – Sep 2022

[Repository Link](#)

- Collaborated on a web-based salon management application using Flask (Python) and SQLAlchemy to streamline appointment scheduling, employee coordination, and service tracking.
- Engineered a multi-tier user role system (Admin, Employee, Customer) featuring an interactive booking interface with real-time availability and integrated payment processing.

SKILLS

TECHNICAL SKILLS	• Programming Languages: JavaScript, Java, Python • Frontend: Tailwind CSS, React.js, Node.js, Express.js • Databases: MySQL, MongoDB, Firebase,PostgreSQL • Version Control: Git, GitHub
SOFT SKILLS	• Problem-Solving • Communication • Adaptability • Time Management • Critical Thinking • Agile Mindset

VOLUNTEER EXPERINCE

Logistics Team Lead	
Robotic Society Of Technology – RUSL	2024 – Present
Member	
Free & Open Source Software Community (FOSS) – RUSL	2023 – Present
Member	
ATIT Rajarata – Association of Technology IT	2022 – Present
